

# Ezquerra Single Cover Feeder Kit for Angelus® model 60L Seamers (Cannery or Can Shop Seamers)

## **Simplicity.**

This is the best word to describe the ease of installation and operation of our Single Cover Feeder kits. The kits are based on the design principles found on high speed can seamers that have been successfully used for many years. Ezquerra is the **first and only** company to incorporate this simple design to the Angelus® model 60L.

*Ezquerra Single Cover Feeder mounted on a fully rebuilt Angelus® 60L.*

*Most of the parts in our kit (including the separator disc) are **standard** to the Angelus® 61H.*

## **Seamless Installation.**

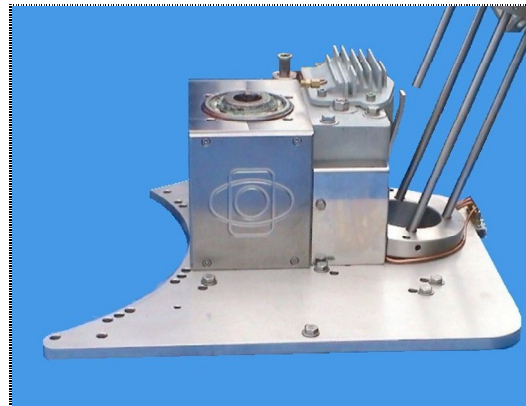

The installation of this system is simple. First you remove the existing cover feed system (including the frame part) from your 60L. Then you install the stainless steel plate (included) which has the Single Cover feeder pre-mounted. Then, easily mount the three photo-eyes and control panel included with the kit.

## **Say "No" to the Timing Belt.**

Unlike other models made by our competitors, *our system does not* utilize cumbersome timing belts. Timing belts are difficult to adjust and eventually must be replaced.

## **Our Single Cover Feeder Features:**

- ✓ Easy Installation
- ✓ Simple Adjustment
- ✓ Proximity Sensor for No-Can No-Cover Detection
- ✓ Handles Easy Open Ends (covers)
- ✓ All Contact Parts In Stainless Steel
- ✓ Easy access to Central Lubrication Point
- ✓ Easy access for top and bottom cleaning
